ABOUT AGT FOODS AUSTRALIA

AGT Foods Australia, a division of AGT Food and Ingredients Inc., is a global leader in value-added processing of pulses, staple foods and ingredients for export and domestic markets. AGT Foods was founded on the principle *'From Producer to the World'*, buying pulses and specialty crops from farmers around its facilities in Canada, the U.S., Turkey, Australia and South Africa and processing and exporting its non-GMO, gluten-free and non-allergenic products to over one hundred countries around the world.

AGT Foods Australia is headquartered in Toowoomba, Queensland — one of Australia's largest production areas for pulse crops, with state-of-the-art production facilities in Bowmans, South Australia; Horsham, Victoria; and Narrabri, New South Wales, as well as cleaning and exporting facilities in Kadina, South Australia. These facilities feature cleaning, sizing, splitting, colour-sorting, and packaging capabilities for lentils, chickpeas, yellow peas, faba beans, broad beans and specialty crops. AGT Foods also produces a full range of PulsePlus™ food ingredients through its pulse ingredient production facility in the United States. Other operations are located in major pulse producing origins including AGT Foods Canada in Canada, the Arbel Group in Turkey, AGT Food and Ingredients (Tianjin) Co. Ltd. in China, AGT Foods Africa in South Africa, AGT Foods India in India and AGT Poortman with sales offices in Europe. AGT Foods products are available in canned and dry small pack form at retailers across Canada and in many parts of the U.S. through its AGT Foods Retail Division.

AGT Foods, through the merchandising activities of its global operations, reaches producers all over Canada, the U.S., Turkey, Australia, Russia, China and South Africa and customers across the globe. Major regional markets include the Indian subcontinent, the Middle East, North Africa, North and South America and Europe. In many of these regions, pulses are a major consumption source for protein.

CHANA DAL

AGT Foods is proud to offer premium quality *chana dal* to the world market. Split from Sortex quality Australian desi chickpeas, chana dal is a traditional favourite of consumers from the Mediterranean to the Bay of Bengal and beyond.

A traditional staple of the Far East, chana dal is increasingly becoming a popular dish in the West because of its high protein and fibre content and incredibly low glycemic index rating, making it an excellent part of a healthy diet. Chana dal is prized for its sweet taste, smooth texture and usefulness in cooking.

Chana dal is offered in Sortex split quality and is packaged in a premium quality 18, 25 or 50 kilogram laminated polypropylene bag. All aspects of chana dal say premium quality.

SPLIT FABA BEAN

AGT Foods is proud to offer Australian origin split faba beans, the most versatile faba beans in the world. Available year-round from AGT Foods, the Australian split faba bean is one of the highest quality beans in the market today, featuring a clean split profile and a traditional taste preferred by consumers across the globe.

THE
PREFERRED
FABA BEAN

A versatile staple of traditional cuisine, split faba beans are eaten in hundreds of different ways around the world. Whether they are stewed, fried, boiled or pureed, split faba beans are always delicious, and feature a heart-healthy nutritional profile full of protein, fibre and essential nutrients. Split faba beans are an excellent addition to the diet of health-conscious consumers, who prize them for their large size and dense, meaty texture.

The split faba bean is offered in Sortex quality and is packaged in a premium quality 18, 25 or 50 kilogram laminated polypropylene bag.

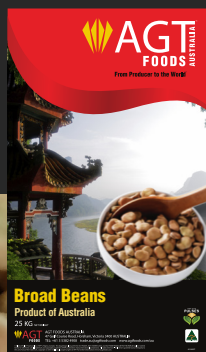

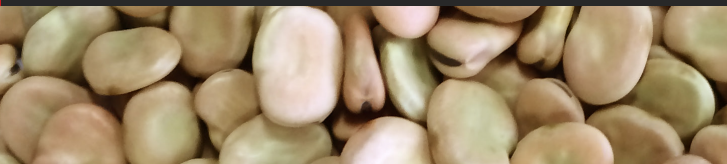

AUSTRALIAN BROAD BEAN

AGT Foods is proud to offer Australian origin broad beans, the best-tasting broad beans in the world. Available from AGT Foods in both large and small varieties, the broad bean is a quality, protein-packed bean with an excellent nutritional profile. A quality source of essential nutrients, broad beans are one of the most ancient plants in cultivation today and a traditional favourite around the world.

A TRADITIONAL
SOURCE OF
PROTEIN

The broad bean features an attractive large size and a dense, meaty texture preferred by consumers around the world. They are nutrient-rich, heart-healthy, low in fat and high in protein and fibre, making them one of the most versatile food sources available today.

AGT Foods broad beans are offered in Sortex quality and sized to the traditional calibres — 65/70 and 90/110 beans per 100 grams. Our broad beans are packaged in a premium quality 18, 25 or 50 kilogram laminated polypropylene bag.
